Balloonia

Nuestras instalaciones / Our facilities

La gratitud es para compartirlo:

Gracias a todos nuestros clientes, por 12 años de experiencias, trabajo, esfuerzo, ilusiones y lo más importante, motivación.

Motivación para seguir esforzándonos diariamente por mejorar y dar lo mejor de todo nuestro equipo para cumplir las expectativas de cada uno de vosotros.

Permitidnos realizar una breve introducción para todos aquellos que aún no han trabajado con nosotros o que sí lo han hecho pero desconocen la historia de nuestra empresa, Balloonia.

Hace 12 años empezó este proyecto familiar, con muchísima ilusión y ganas de crear algo especial. Hoy en día, seguimos en el proceso de mejora y perfeccionamiento de nuestra labor, intentando obtener siempre unos resultados que meramente se basen en la satisfacción de nuestro cliente y en la excelencia de nuestra producción.

Todo este esfuerzo ha hecho posible que consigamos crear una extensa variedad de tamaños de globos, así como una gran gama de colores, que nos han permitido posicionarnos en un lugar destacado en el mundo de la decoración con globos.

En estos años ha sido nuestra meta, mejorar, avanzar y persistir. Esta constancia nos ha hecho conseguir logros, contamos con más de 10.000 m² de instalaciones y maquinaria de última generación, tanto de fabricación como de impresión de globos.

Nuestra fabricación da como resultado un producto biodegradable. Látex de caucho natural, pigmentos orgánicos y demás componentes, pasan controles por laboratorios homologados de forma periódica, asegurándonos el completo cumplimiento de las normativas vigentes.

Estas acciones han repercutido positivamente, en una ampliación de distribuidores nacionales e internacionales, que día a día valoran la calidad del producto y nuestro compromiso con el cliente.

Desde la humildad, respeto y el deseo de seguir en este proceso de búsqueda... ¡esperamos verles por el camino!

Gratitude is for sharing:

We want to say thanks to all of our customers for giving us 12 years of experiences, work, effort, excitement and, above all, motivation.

The motivation to carry on doing our utmost, every day, to improve and give everything our team can to meet the expectations of each one of you.

Please allow us to introduce ourselves briefly to anyone who hasn't worked with us yet, and also to anyone who has, but doesn't know the history of our company, Balloonia.

We set up as a family company 12 years ago, full of excitement and wanting to create something really special. And today, we continue to improve and perfect our daily activity, always seeking results based simply on customer satisfaction and the excellence of our product.

Our tireless dedication has enabled us to create balloons in a wide variety of sizes and colours, and as a result we have been able to position ourselves as a leader in the field of decorative balloons.

Over all these years, our goal has been to improve, advance and stay constant. Our determination has enabled us to make great strides; we now have production facilities measuring over 10,000 m² equipped with cutting-edge machinery for manufacturing and printing balloons.

Our manufacturing method produces biodegradable goods. We use natural latex rubber, organic pigments and other components that are regularly tested in approved laboratories to ensure full compliance with prevailing regulations.

These activities have borne fruit and resulted in the expansion of our national and international distribution network. Our distributors value the quality of our products and our commitment to customers.

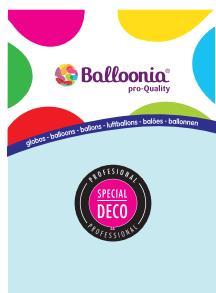

We modestly and respectfully hope that you will stay with us, or meet us for the first time, on our road to the future!

Balloonia®
pro-Quality

**Nuestros globos están fabricados con 100% natural
látex y son biodegradables.**

El látex procede de la savia del árbol del caucho (*Hevea brasiliensis*). Esta savia, al contacto con el aire sufre un proceso de oxidación en cuestión de horas.

La biodegradabilidad del látex es un proceso bien documentado. Son numerosos los estudios realizados que demuestran su rápida degradación aunque esta depende, en gran medida, de la cantidad y grosor del material. En el caso concreto de los globos, en los que la película de látex apenas alcanza 1mm. en su posición de reposo, la biodegradabilidad, en términos de tiempo, es similar a la de la hoja de un roble, por ejemplo.

Por otro lado, los estudios documentan que el látex es un sustrato adecuado para la proliferación (de forma natural) de bacterias y hongos que degradan el material, lo que demuestra su alto grado de biodegradabilidad.

En cuanto a los aditivos utilizados en la fabricación de los globos de látex, tanto el propio látex, como los colorantes o los sulfuros, son materiales que se encuentran en la naturaleza en el estado en que se emplean en la propia fabricación. Además, las plantaciones de árboles de caucho, reducen el calentamiento global.

El látex, que se usa para la fabricación de globos, se recoge haciendo unos pequeños cortes al árbol que no lo dañan. El árbol del caucho puede producir látex durante 40 años. Cada año se cosechan árboles viejos y se plantan nuevos.

Los globos de látex son fabricados con materiales naturales que garantizan su rápida degradación. Si bien, la degradación dependerá de las condiciones en las que se encuentre el globo, como humedad, temperatura, presión, sustrato, etc. ... podemos afirmar, sin ningún resquicio de duda, que los globos de látex que Balloonia fabrica, son productos sostenibles, ecológicos y biodegradables.

**Our balloons are manufactured from 100% natural
latex and are biodegradable.**

Latex comes from the sap of the rubber tree (*Hevea brasiliensis*). When this sap comes into contact with the air, it begins to oxidise within a matter of hours.

Latex biodegradability is a well-documented process. Numerous studies have shown that its speed of decomposition depends largely on the amount and thickness of the material. Specifically, as regards balloons, when uninflated the latex layer is barely 1 mm. thick, and in terms of biodegradation time is similar to an oak leaf.

In addition, other studies show that the nature of latex favours the growth of bacteria and moulds that break the material down, furthermore proving the highly biodegradable properties of latex.

As regards the additives used in the manufacture of latex balloons, both the latex itself and the colourant or sulphide materials used in the manufacturing process are in their naturally occurring form. Also, rubber tree plantations reduce global warming.

Latex, that is used for balloons production, is collected by making small incisions in the bark of the tree which do not harm it. Rubber trees can produce latex for 40 years, and each year, old trees are felled and new trees planted.

Latex balloons are manufactured from natural materials which ensure rapid decomposition. Although this decomposition does depend on the conditions the balloon is used in, such as humidity, temperature, pressure, substrate, etc., we can claim with all certainty that the latex balloons manufactured by Balloonia are sustainable, environmentally-friendly and biodegradable products.
